

# COOL ROOF RESISTS HEAT

Dulux AcraTex 962 Roof Membrane Cool Roof is a coating with a high degree of solar reflectance designed to keep your roof cooler.

With its heat resistant properties, Cool Roof assists in reducing energy consumption and will make your home cooler during hot summer days.

In fact, scientific studies in the USA\* have shown that a house with a similar coating used 21.9% less energy in summer than one without it.

The coating also reduced energy demand in winter by 3.99%.

\* University of Southern Mississippi study in conjunction with Rohm and Hass 1995.
